Inno[✓]8 ACM

Introduction:

Advanced Code Maintenance is an innovative utility which allows you to edit, merge and rationalise your nominal codes and departments. You can edit customer, supplier and product codes, change stock item types whilst retaining full transaction activity.

All occurrences of the changed Codes/Departments are permanently updated throughout the Sage data files so that the data will be as if the new codes had been used from the outset. This means that not only are the Ledger Codes changed but also the Account Activity is retained on the relevant Ledger Account, on the Audit Trail, on all POP and SOP postings, all Invoices, all Stock Records, all Recurring Postings, all Prepayments and Accruals, all Delivery Addresses, All Price Lists...

"We guarantee that every Sage 50 user will find ACM useful, very useful or essential! ACM is a simple and incredibly easy-to-use utility programme that will help your day-to-day usage of Sage 50 and enable you to produce more meaningful reports."

Carl Maher - Innov8's Commercial Director
