Inno^v8 Acti-Link

Introduction:

Acti-Link is Innov8's standard integration between the market leading Sage 200 business suite and Actinic's industry recognised e-commerce portal. The link provides two-way data synchronisation between your online business trading solution and your Sage back office, and allows an order entered on the internet to be passed directly back into your accounts system.

Your Sage Sales Ledger, Stock Levels and Pricing files are interpreted by Acti-link and then exported to Actinic to create your Product Catalog. On receipt of Internet orders in your Actinic website, Acti-link transfers the orders into your Sage Order Processing module as if they had been entered manually. Sage 200 then continues to process the orders through to completion as usual.

Acti-Link is fully automated and updates Sage 200 without human intervention. You can put an end to re-keying, stop duplication and introduce much better accuracy into your information. Your web based business can derive real benefits, saving precious time in processing transactions. This additional speed in processing can help you particularly at times of high demand.

Benefits:

- **Process Payments through to Sage.**

Process Credit/Debit payments online. Pass the authorisation details through to your Sage.

- **Increase Accuracy - Reduce Errors**

The direct link to your Sage system ensures that errors don't creep in.

- **Increase Speed**

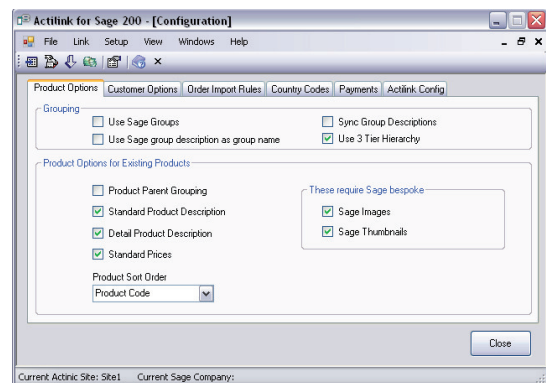

Print orders directly from your accounts system as they are paid for. Turn orders around much more quickly!

- **Save Time**

Duplication is a thing of the past with no re-keying of orders.

- **Customisable**

Acti-Link can be configured to your business requirements. Ask your representative for more details.

Configure Acti-Link's GUI quickly and easily.

How it Works:

Sage Sales Ledger, Stock and Pricing files are interpreted by Acti-link and then exported to Actinic Business to create the Product Catalog. On receipt of Internet orders into the Actinic Business product, Acti-link transfers the orders into Sage Order Processing as if they had been entered manually. The Sage system can then continue to process the orders through to completion. There are also a number of setup options, which enable the user to configure Acti-link to best suit individual company data sets and operations.

Innov8's Inn range solutions are built with the latest technologies. the system delivers real business value through easy and safe integration with your existing accounts and back-office solutions.

Customers

Indy

Indy are an independent supplier of mobility and disabled living products based in Evesham. Their new £1.5m premises were opened in 2008 by Dame Tanni Grey-Thompson and the Mayor of Evesham. Their extensive showroom and online store carries a huge selection of products to make life easier for disabled and mobility challenged people.

While their extensive show room allows people to see and test the various products, Indy's Actinic based e-commerce site helps to make their products even more accessible.

Innov8 has supplied and installed Acti-Link to pass sales information to their Sage 200 back office solution. The combination of Sage 200, Acti-Link and Actinic saves the business time and money removing the need to re-key information and orders. The solution uploads product information directly to their website including prices and stock information whilst downloading any orders received through their site directly into their back office.

For more information on Indy please see their website at:
