

Introduction:

Most businesses have data in many different systems and formats making intelligent reporting across the business at best difficult and at worst impossible.

InnView is a revolutionary web based reporting tool that collects information from Sage 200 and any other sources and creates up to date, business intelligence. This will help you to plan more effectively and make more informed decisions about your business.

We have recently added scheduling functionality which allows you to automatically deliver reports directly to your management team in many different formats. Once you have decided who should get it and when, just leave the rest to InnView!

Comprehensive Reporting from any area of your business or a combination.

ACCREDITED BUSINESS PARTNER

Benefits:

- **Deliver reports in many different formats.**

InnView can send reports to each member of staff in their preferred format.

- **Deliver your reports automatically.**

Reports can be scheduled to run automatically. Simply build the report you want in the management control panel and tell it when you want it and who it needs to go to. You can then sit back and let InnView do the rest.

- **Low cost of ownership.**

Using a single user Crystal Reports license stops the usual scenario of one per machine and saves you a great deal of money. The same is true of the SQL back end used by InnView, this is based around SQL 2008 Express and is available as a free download.

- **View multiple queries on one report.**

Instead of a single sheet for each area of your business you may want to combine them into one quick view.

InnView utilises Crystal Reports technology which allows you to run multiple queries against your various systems and then display them together. It is possible to report across multiple databases at the same time – Finance, Warehousing, Operations databases etc.

- **Easy to access and maintain.**

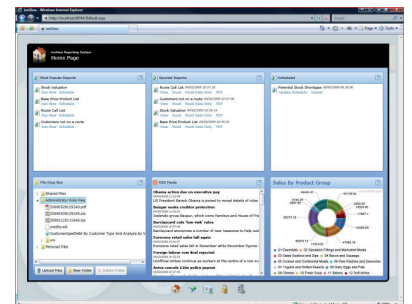

The simple to use interface is web based, meaning you can change the reports your teams receive, and when, from anywhere through the wonders of the internet.

- **Never lose your reports.**

Unlike paper reports the InnView Spooler allows you to recover reports long after they were run. View historical information, analyse trends and see patterns.

- **Better decision making**

InnView allows you to report across your business and distribute it to your management team when they need it, allowing you to make more effective decisions based on real time data.

Comprehensive Reporting from any area of your business or a combination.

- **Crystal Reports Engine.**

No specific programming knowledge is required, everyday Crystal Reports expertise will allow the creation and publication of reports within InnView.

Inn Range

Customers

InnView is already in use in many of Innov8's customer sites around the UK and Ireland helping these companies to gain a more thorough insight into their business and how they are performing.

Maple Fleet Services are one of the UK's leading authorities on commercial vehicle security and fleet management systems. Maple's extensive product range and policy for continual development guarantees a cutting edge solution for almost every fleet management problem.

For over 30 years, Maple has been providing the commercial fleet operating industry with solutions to their vehicle security problems.

Innov8 installed InnView at Maple Fleet's offices in Stockport back in 2006 and they are deriving real benefits from the reporting it provides.

"Innov8's InnView product has radically improved the way we receive business critical information. InnView allows us to generate real time reports using information from different sources across the business. We have set up InnView reports for Accounts, Sales, Purchasing, Production and Marketing functions, allowing us to automate and deliver up to date information to the people who matter when they need it."

Chris Shaw - General Manager - Maple Fleet Services.
